OBJECTIVE

A creative and professional team player with 2+ years of experience providing quality assurance with various domains like Ecommerce and travel. Expertise in Manual Testing, Mobile Testing, API Testing, Automation and accessibility testing on different applications mainly web based, client server, mobile applications.

PROFESSIONAL SKILLS

- Excellent understanding of Software Development Life Cycle (SDLC), Test Methodologies (Agile – BDD & Scrum and Waterfall) and all phases of Software Testing Life Cycle (STLC).
- Wrote test cases as per the requirements, self-review and peer review done for other requirement/acceptance criteria.
- Validated sites across various browsers and operating systems, verified the accuracy of links, visual presentation and its alignment with design specific on both Web and Mobile application.
- Ability to write test plans and test cases to perform Functional, Regression, Integration, End to End, GUI, Ad hoc, Smoke, Sanity, Exploratory and User Acceptance Testing (UAT).
- Experience in performing cross browser testing on Windows operating system
- Performed Accessibility Testing on multiple browsers: IE, Firefox, Chrome
- Strong skill in Implementing feature files written in Gherkin format.
- **1-year** Experience in designing Automation scripts using **Selenium WebDriver**, **Java** as a programming language, **Cucumber** as a BDD tool.
- Experience in implementing Page object model using **Selenium WebDriver**.
- Experience in using **GIT** and CI Tool - **Jenkins**.
- Experience in Webservices testing using **POSTMAN**.
- Experience in API Automation Testing using **RESTAssured**.
- Verified API Request and JSON Response with the methods GET, POST, PUT, DELETE etc.
- Reported defects in defect tracking System JIRA, and linked it with the requirement to trace the progress of each phase (from development to release in production)
- Active participation in the review and analysis of JIRA issues.
- Identified defects and logged them in **JIRA** as per defect logging guidelines.

- Good exposure of working on multiple size projects throughout their various phases including project initiation, analysis, development, testing.
- Ability to work with Stakeholders, Project Managers, Business Analyst, Developers including onshore and offshore QA Team as well as Client's site.

TECHNICAL SKILLS

Methodologies	: Agile – BDD, Scrum, Waterfall model.
Tools	: Selenium WebDriver, Cucumber, POSTMAN, Rest Assured
Languages	: JAVA, JSON.
Code Repository	: GITHUB
Other Tools	: IntelliJ, Junit, Maven, Jenkins, Jira.
Operating Systems	: Windows, MAC.
Microsoft Technologies	: Excel, Word, Power point.

EDUCATION QUALIFICATION

Master in Commerce from Gujarat University, India, 1996

EXPERIENCE CHRONOLOGY

QA Analyst

Client – Star Tours Ltd.UK

Jun 2018 to till date
