**Summary:**

Holding around 4 years of experience as a Java Programmer in application development technologies based on **Client** and **Server** applications.

**Experience Summary:**

- Currently working as Associate Consultant in **Capgemini Technology Services India Limited**.
- Worked as Software Engineer in **Prodapt Solutions**.

**Academic Qualifications:**

- B.Tech in Electronics and Communications Specialization from JNTU Ananthapur.

**Technical Skills:**

- |                            |  |
|----------------------------|--|
| · Operating Systems        | : Unix, Windows 10.                                  |
| · Programming Languages    | : Java, Angular                                      |
| · Frameworks               | : Spring Boot, Microservices, Spring (MVC, IOC, ORM) |
| · ORM Tool                 | : Hibernate  |
| · Build Tool               | : Maven  |
| · Web services             | : Microservices, Restful services                    |
| · Web & Application Server | : Apache Tomcat                                      |
| · Database                 | : MySQL, PostgreSQL                                  |
| · Version Control Tool     | : GIT, SVN   |
| · Logging Tool             | : Log 4J   |
| · IDE                      | : Eclipse, STS                                       |

**Job Responsibilities:**

- Strong Knowledge in Object Oriented Programming.
- Experience in developing applications using **Microservices with spring boot and Hibernate Integration, using Maven Build tool**.
- Working Experience on **spring (IOC, MVC), Hibernate (ORM)**.
- Experience in Using **GIT, SVN** for code repository and as version control mechanism.
- Experience in Using **Log 4J** for logging and debugging.
- Flexibility and Adaptability in regards with new technologies and environments.
- Worked in a Process like **Agile Methodology**.
- Having good Analytical, Programming and Problem solving skills with excellent interpersonal skills.

- Development and implementation of applications using J2EE technologies.
- Capable of delivering solutions as an individual and as part of a team.
- Ability to learn new technologies quickly.
- Good Communication and Presentation skills.

## **Details of professional History:**

### **Project 1:**

**Client** : MADAME  
**Environment** : Java, spring boot, Microservices, Web services (Rest), Hibernate, Angular, Tomcat, GIT, Maven, MySQL, Log4j.  
**Platforms** : Linux, Windows  
**Role** : Developer

#### **Description:**

MADAME is Customer Master platform that can use to manage customer data, used to manage customer profile (create, update, delete customer data like basic profile, address, contact, email etc ). can store and retrieve customer support documents, Madame is used to manage customer compliance data, customer product and services data, data related customer eservices etc..

#### **Roles and Responsibilities:**

- Gathering requirement from business team and developing based on the functional and technical specifications
- Development and Implementation of the services
- Involved in coding for new enhancements and features.
- Analyzing test results to assure quality of existing and new functionalities.
- Preparing documentation & report summaries.

### **Project 2:**

**Client** : QServs(Quick Services)  
**Environment** : Java, spring, Web services (Rest), Maven, Log4j, Tomcat.  
**Platforms** : Linux, Windows  
**Role** : Developer  
**Description:**

QSERVES is one stop solution for all home needs like electrician, painting, plumbing, cleaning and etc. This Application helps to serve the clients with the best quality, highly reliable and recommended Independent Professionals and Enterprise Service Providers. With QSERVES on your fingertips, all your domiciliary needs will be taken care of. The software offers an extremely quick, easy and customized search option for your

requirements. It also provides a real time attendance of all service providers around you, ensuring that there is someone to address your needs always.

**Roles and Responsibilities:**

- Gathering requirement from business team and developing based on the functional and technical specifications.
- Analyzing and understanding the requirements based on the documents.
- Involved in development of Controller Classes.
- Involved in the DAO's and their implementation using Hibernate.
- Deliver bug free output to Team Lead verification.
- Preparing documentation & report summaries.
- Analyzing test results to assure quality of existing and new functionalities.

**IT SKILLS:**

Operating Systems : Windows 10, Linux.  
Java Tools/Utilities : Core Java, Spring boot, Spring(IOC, MVC, ORM), Hibernate, Jdbc, MicroServices, Eclipse, Log 4J ,Html, Java script.

**PROFESSIONAL SKILLS:**

- Commitment
- Proactive Approach
- Good team player
- Willingness to learn
- Hard working and known for on time performance

**DECLARATION:**

I hereby declare that all the above-furnished information is correct and true to the best of my knowledge.
