Duration : **July 2011** - Till date

Client : Alegeus - Consumer Driven Healthcare

Technical Details : MVC, Dot Net Core, ASP.Net, C#.Net, SQL Server, LINQ, Entity Framework, ADO.NET, Web API, JavaScript, JQuery, JSON, XML, REST, TFS and WCF Service, Windows services, WCF

Team Size : 70

Company : FIS Global Business Solutions.

Client Name : **Alegeus\ FIS Global Business Solutions.**

Duration : **July 2011** - Till date

Description:

This is a Web based wealth care portal that provides debit card access to multiple healthcare's and employer sponsored benefit accounts as well as the ability to enter and reimburse manual claims. By providing customizable auto-substantiation rules, it reduces manual processing, making payments more convenient for consumers and more cost-effective for administrators.

This is a project about medical benefit insurance that is available in USA for all the employee something like (PF) where the employee and employer both will contribute a Nominal amount for any medical expenses that may come up for the employee.

It is a software solution that automates most of the benefits management process. Using this, your organization can create a disciplined and efficient environment for managing benefit claims and tracking employers, benefit plans, and employees.

This is a Web based benefits payment system that provides debit card access to multiple healthcare's and employer sponsored benefit accounts as well as the ability to enter and reimburse manual claims. By

providing customizable auto-substantiation rules, it reduces manual processing, making payments more convenient for consumers and more cost-effective for administrators.
