Technical skills:

Proficient in UNIX, SQL queries, and MS Office, Salesforce, hpalm, Qtest, Jira, CA Agile.

Work experience:

Organization: CENTRICA PLC

Position: Senior Test Analyst/Test Manager- GDPR (AGILE)

Duration: 09/08/2018 – 31/03/2019

Project Description: To build a service that ensures compliance with new GDPR (General Data Protection Regulation) legislation that states how to fulfil Subject Right Requests from anyone, Centrica and Bord gais hold data on either as a customer, colleague, prospect or candidate. The project scope involves the 6 Rights under GDPR which are;

The right to be informed, the right of access, the right to erasure, the right to restrict processing, The right to object, Rights related to automated decision making and profiling.

This project also provided the opportunity to work directly with the in-house development team (Salesforce and RPA [Robotic Process Automation])

Responsibilities: -

As a Senior Test Analyst/Test Manager, I was responsible for the below activities of the project:

- Creation/ Updating of test scripts in Rally CA agile.
- Creation of Test Plan/Design.
- Creation of Test Data.
- Creation of Test Strategy.
- Coordination of UAT.
- Maintenance of Rally CA Agile for the project.
- Daily reporting on updates in scrum meetings on progress of the Daily Test Status.
- Test Exit Report.
- Coordination with Business Analyst to ensure the technical requirements are aligned with the business needs/ requirement.
- Coordination with the Development team for defect fixes.
- Close coordination with the scrum master to provide daily updates on the test progress.
- Update Test evidence and test activities on SharePoint for stakeholders' visibility.

Organization: CENTRICA PLC

Position: - Test Manager- SERVICENOW UPGRADE 2018 (WATERFALL)

Duration: 11/09/2018 – 11/12/2018

Project Description: The ServiceNow London Upgrade 2018 project is basically upgrading the base code to its latest release (from Jakarta to London). This upgrade is being implemented to keep the strategic service management platform, 'supported' and updated.

The approach as the Test Manager was to work with the IS leads from Centrica (British Gas, Direct Energy, Bord Gais Energy, FUJITSU) and ServiceNow support team (COGNIZANT) to develop a joint plan and roadmap for upgrade. The aim was to upgrade the current Service Now with like to like functionality with no impact to existing functionality.

Responsibilities: -

As an experienced E2E Test Manager, I was assigned to this project which required the management of resources (offshore and onshore) in house development team to ensure a smooth delivery is achieved, while in parallel carrying out the test management activities for the delivery of the project for the different testing phases required.

As the E2E Test Manager, I was responsible for the below activities of the project:

- Creation/ Updating of test cases in HPALM by co-ordinating across process owners/leads
- Creation of Test Plan
- Coordination of UAT
- Maintenance of HPALM for the project
- Monitoring Circulation of the Daily Test Status reports
- Test Exit Report

Testing will cover the functional, to prove to the Business Stakeholders, and the Project that their requirements have been met and that the solution is suitable for implementation.

- Unit Testing / Functional Testing
- Integration Testing
- UAT (including Interface testing)
- Performance Testing
- Detailed Test Plan and Schedule
- Daily Test Status Reports
- Test Exit Report
- Defects logged in HPALM-12 or equivalent tool
- Stakeholders progress report

All test incidents and defects were managed in HPALM-12 and Qtest and managed in accordance with the Defect Management Process.

Organization: TESCO PLC

Position: Manual Test Analyst

Duration: 01/12/2015 - 01/06/2018

Project Description: Responsible for developing and executing comprehensive suites of automation test plans and test cases, maintaining and adding to existing automation framework, continued evaluation of test cases for inclusion in regression, automation for newly integrated features, and development of tool sets to augment QA and Development testing. I also worked closely with Product Manager, UX and other engineers to deliver the highest quality products in a timely and cost-effective manner, Customer account detail.

Environment - Windows, SQL Server 2005, Test in JavaScript driven framework (Cucumber/Mocha/Jasmine/Jest) or Ruby Cucumber (Gherkin) / RSpec tests.

Technology - SAP CRM/ISU.
