

**ADITI**E-mail id : [ady1321@gmail.com](mailto:ady1321@gmail.com)

Phone : 7774134917

**CAREER OBJECTIVE**

To be associated with a progressive organization which will not give me a chance to leave company neither in terms of monetary benefits nor in terms of learning options along with upgradation of my skills as per market standards.

**PROFESSIONAL SUMMARY**

- >Having **5 years** of experience in Testing.
- >Involvement in Integration, Functional, System, Regression, User Acceptance Testing.
- >Having good work experience in executing test cases and reporting defects.
- >Good exposure to Bug Life Cycle using **Rally, JIRA & QC(ALM)**.
- >Good knowledge in SDLC and STLC and Agile process and understanding Software Requirement Specification.
- >Participated in writing and analysing test cases and execution of test cases and status reports.
- >**Proficient in direct communication with clients and analyzation of business requirements.**

**WORK EXPERIENCE**

Company Name	Job title	Functional Area	Duration
TravelTripper	Sr. Test Engineer	QA/Testing	Aug 2017 to Present
Ness Technologies	Sr. QA Engineer	QA/Testing	September 2016 to June 2017(9 months)
Hackerearth	QA Engineer	QA/Testing	March 2016 to September 2016 (6 month(s))
IBM	Test Specialist	QC/QA, Testing	Dec 2012 to March 2016 (3.2 year(s))

**EDUCATIONAL QUALIFICATION**

**B.Tech in Information Technology** from Guru Gobind Singh Indraprastha University with aggregate 80.9%

**TECHNICAL SKILLS**

Primary Skills	QC(ALM), Rally dev, Jira, SOAPUI, Selenium, Asana, Phabricator, Windows, Linux, Altova XML Spy
Secondary Skills	HTML, XML, C, C++, C#, Core-Java, J2EE(JSP, Servlet, JDBC), php, .net, Java Script, SQL, MYSQL

**PROJECT DETAILS**

**Company:** TravelTripper

**Product :** Reztrip

This product was the admin to create Booking engine for various hotels websites with different features and functionalities

**Client:** Caesars

**Project:** Call Center

This project is about creating a complete new UI for call center of Caesars with main functionality of reservation search, modifications, new reservations, guest profiles, loyalty reservations and user control/navigation.

**Roles and responsibilities :** Handling spec reviews and defect triage calls, preparing test plans along with requirement clarification/improvement from product manager, reporting and following up on bugs in JIRA with dev team, doing regression for weekly builds, testing various releases of Booking UI and admin and writing automation scripts for regression scenarios of Reztrip and booking UI.

**Company: Ness Technologies**

**Client: 1WorldSync**

**Project: IM GUI Enhancement**

This project is about enhancing the existing IM GUI from old technology of struts and hibernate to angular js and testing that all the functionalities are working same way as before.

**Roles and responsibilities :** Handling scrum calls, reporting and following up on bugs in JIRA with dev team, creation of test data, maintenance of test results, production support, backend testing of XML files using XML Spy.

**Company: Hackerearth**

**Product : Business to Customer part**

This product was about how users can interact with Hackerearth website in different ways. Timely enhancements were done in the product to increase the number of active users on website and classification of hackathons and Competitive challenges were done under specific areas to make the UI more interesting and understandable for user.

**Roles and responsibilities :** Analyzing product changes using Asana tool and preparing testcases, automating regression and repetitive test cases using selenium, co-ordinating with product manager for enhancements, maintaining bugs in phabricator.

**Company : IBM (2012 - 2016)**

**Client : NBS(Nationwide Building Society)(Aug2015 – Mar2016)**

**Project1: MSO Live Support**

This project is about resolving live issues related to MSO(Mortgage Sales and Operations) which occurred at customer's end after project deployment.

**Project2: SQL Upgrade**

This project is about upgrading the Microsoft SQL Servers of MSO application from 2003 to 2008 and 2012 version of servers . Whenever any database of any environment is upgraded to newer version, then all the applications flows are tested end to end to ensure that no existing services is broken and everything is working fine.

**Project3: Shared Services**

This project is about any upgradation or changing the service shareable between different applications or Databases. If any code change, database related change or any other change happened in any of the services then whole end to end flow needs to be tested that whether it is working fine or not.

**Roles and responsibilities :** Doing smoke testing of environment, analyzing requirement document, preparing test case scenarios, execution of testcases , maintaining testcase results, reporting defects in HP ALM.

**Client : AT&T(American Telephone & Telegraph)(Feb2013 – Aug2015)**

**Project 1: Wireless Card Integration into AVPN Mgd Router 4G Primary Connectivity**

Provide integrated contracting and billing for AVPN Managed Router customers who desire mobility backup and enhance the AVPN Managed Router product by enabling the Cisco 819 as a standard CE router for AVPN Managed offer and enable/support the Cisco LTE Wireless WAN-E HWIC card.

**Roles and responsibilities :** Had done the end to end testing of all connected applications including SQL database testing , SOAPUI tool for XML requests and response files, reporting defects in HP ALM along with mentoring of new joiners.

**Project 2 : 273349 – ABN VPN Value Bundle Express**

This was an agile project and its main objective is to ensure to provide all main services (AVPN, BVOIP, ANIRA, NBFW) to customer in a package or bundle known as VPN Value Bundle.

**Roles and responsibilities :** Had done the end to end testing of all connected applications including SQL database testing , SOAPUI tool for XML requests and response files along with mentoring of new joiners, used Rally dev for defect and user stories maintenance.

**Project 3 : Voice Canadian Taxation**

This project is to ensure Canadian fixed voice can be taxed in compliance with AT&T Corporate global tax (2 out of 3 rule), including all applicable regulatory fees, for 3rd party services sold in Canada.

**Project 4: Managed AVPN Wireless Backup**

This project uses leading edge Mobility and wireline network technology (GRE tunneling, BGP routing and VRF updates) to

enable wireless backup access to an AT&T VPN when the wireline access goes down. It adds four new wireless resiliency options to the existing wireline resiliency options for Managed AVPN. Customers will aggregate their wireless traffic at a Mobility data center, and receive that traffic at their AVPN VPN via an Interconnect Enterprise connection, over the AT&T common backbone network. This creates a secure, reliable and standards-based end-to-end VPN from their premises CE (with wireless capability) to the MPLS Core through the Mobility Data Center.

**Roles and responsibilities :** Had done the end to end testing of all connected applications including SQL database testing , SOAPUI tool for XML requests and response files along with mentoring of new joiners.

#### **Project 5 : ATTOM Wholesale**

This project will support Wholesale Billing and Invoicing (US and Canadian)

**Roles and responsibilities :** Preparation of testcases, execution of testcases, handling client calls, getting test results approved from stakeholders, presentation of project within teams.

#### **Project 6 : San Diego Biller Migration to UB**

This project was about to migrate the billing services for both existing and new customers from San Diego biller to Universal Biller

**Achievements :** Got the spark award for this project and client appreciation.

#### **CO-CURRICULAR ACTIVITIES AND ACHIEVEMENTS**

- Secured 3<sup>rd</sup> position in Anduvrat Essay Writing Competition in 2004.
- Awarded Meritorious Award in Ashulekhan Essay Writing Competition in 2005.
- Secured 2<sup>nd</sup> position in Toon Competition organised by Science Exhibition & Science Based Activities in 2005-06.
- Participated in National Standard Examination in Physics in 2007-08 & placed among top 10%.
- Participated in National Mathematics Olympiad Contest in 2008 & secured 60%.
- Participated in Computer Hardware Programme at NSIT organized by SCP in 2008.
- Secured 1st position in Poster event and 2<sup>nd</sup> position in C/C++ quiz at college's annual fest EXUBERANCE in 2010.
- Gate 2012 qualified with score 479.

#### **Certifications**

- Had completed the ISTQB(International Software Testing Qualification Board) Foundation Level Certification Examination with 75% on 10 August, 2013.
