Academic Qualification

- Passed out **MCA(**Master of Computer Applications**)** Examination in 2008 with 63% from SJCE, VTU, Karnataka.

Technical Skills

- **Key Skills:** C#, Asp.Net,MVC,SQL Server, Web Services, WebApi, HTML, JavaScript, jQuery, Angular.
- **Current Role and Responsibilities:** Requirement gathering, Estimation, Analysis, Design, Implementing, Testing, Deploying.

Project Experience

Project #1

Title   : SCREENSHOT AUTOMATION TOOL
Environment   : ASP.NET, Selenium with C#, JavaScript, JQuery, Ajax, Rest API's, Entity Framework, Angular2

Role   : Developer   Duration: 6 months
The Screenshot tool automatically captures screenshots of every live digital ad. Screenshots are used for proof of ad delivery and recording the environment in which the ads were delivered. They are also used during digital audits to prove ad fulfillment.

Project #2

Duration   : 2 Years 6 Months

Project Description: It is a printer related project. This project is responsible for providing maintenance/enhancements for Firmware of MFPs (Multi-functional Peripheral's). MFPs are based on JEDI-Architecture which is already present in the market. This project is one of

the most important projects for our client as it involves feature enhancements and defect-
fixing for MFPs.

Roles and responsibilities:Responsible for development, support, maintenance and implementation of small to medium non-complex components of a project module. Works
on problems of limited scope, through usage of

standard programming concepts and principles. Works under high supervision/ guidance with frequent review of accomplished objectives.

Project Description: It is a printer related project. This project is responsible for providing maintenance/enhancements for Firmware of MFPs (Multi-functional Peripheral's). MFPs are based on JEDI-Architecture which is already present in the market. Role: Senior Developer
Project Duration: 2.4 Years
Environment: ASP.NET, MVC, C#, Javascript

Project #3

Title	**: K12 E-Learning Product**
Environment	**: ASP.NET,MVC, C#, SQL Server 2005**
Role	**: Developer Duration: 6 months**

This tool is an efficient and feature rich e-Learning application, AMS (Assessment Management System) LMS (Learning Management System) and LS (Learning Spaces) an application that leverages the power of web 2.0 tools to enhance learning.

Roles & Responsibilities:

- Understanding of Functional specification provided.
- Involved in designing and coding of the application.
- Customizing based on the client requirements.

Project #4

Title	**: Project Maker**
Environment	**: ASP.NET, C#, SQL Server 2005**

Role : Developer Duration: 2 months

The Project Maker is a tool that helps schools to implement a formative assessment methodology. It is an all-encompassing tool which helps teachers assign curriculum related projects to students. The projects help students don roles of editors & journalists and construct knowledge individually, as well as in collaboration.

Roles & Responsibilities:

- Understanding of Functional specification provided.
- Involved in designing and coding of the application.
- Customizing the Project Maker System as per the Client requirement.

Project #5

Title : **Oral B Websites for Western Europe & CEEMEA Regions**
Environment : **ASP.NET, C#, SQL Server 2005**
Role : **Developer Duration: 7 months**

Roles & Responsibilities:

- Understanding of Functional specification provided.
- Handled total 21 locales in WE & CEEMEA regions.
- Involved in designing and coding of the application.
- Customizing the websitesas per the client requirements.

Project #6

Title : **Ratings and Reviews implementation for P&G Products**
Additional functionality implemented to show consumers ratings and reviews forparticular products using a 3rd party interface.
Environment : **ASP.NET, C#, SQL Server 2005**
Role : **Developer Duration: 1 month**

Roles & Responsibilities:

- Understanding of Functional specification provided.
- Implementing 3rd party interface for ratings and reviews.
- Customizing the websites as per the client requirements.

Project #7

Title : **Calibration Scheduling Service**
This web application is developed to send automatic mail to specific departments in-order to alert that their instrument is due for calibration. It also includes the functionalities like adding new instrument, updating existing and scheduling the calibration for the instruments.
Environment : **ASP.NET, C# and SQL Server2005**
Role : **Developer Duration: 6 months**

Roles & Responsibilities:

- Coding, Documenting and Application maintenance.
- Involved in coding and designing of the WebPages.

Project #8
