NIKE OLABINTAN

ISTQB / ISEB CERTIFIED

Address: 56, Thornham Street, Greenwich, London   • **Email:** toyasolabint@yahoo.com   • **Mobile**: 07715855440

Senior QA Test Analyst

Regarded as a high impact Senior QA with experience in manual and exposure to automated testing. I have thoroughly enjoyed contributing to large projects for major clients. My attention to detail, analytical, critical thinking, problem solving skills and ability to adapt to new tools and applications has afforded me the opportunity to help eradicate errors early in the development phase, thus saving time and money.

I have successfully built the QA function from scratch and managed the QA teams effort to deliver on multiple complex projects that were promoted to production. My recent experience has also given me crucial release management skills and knowledge, allowing timely releases that adhere to the submission guidelines.

I pride myself on being able to think outside of the box, make difficult decisions and having the ability to triage the most critical bugs to ensure the teams effort are in unison, thus allowing high quality products. My communication skills are also another key strength of mine, as I can get my point across in a clear and concise manner, via a defect report or when giving someone an update or instructions. I am a good listener which allows me to understand the task at hand and ask the right questions. I am also a confident individual with the ability to quickly adapt to change and invest myself in the project. I believe my ability to invest in a product separates me from other test analysts as I make it my business to truly understand the product and uncover all critical flaws.

Drawing from learnt lessons, I am constantly looking at ways to become more efficient and ways to apply new skills and tools towards enhancing testing methods. I am currently undertaking and self-developing myself in more Automation courses that will give me better understanding which will improve my ability to understand and find defects. I enjoy staying up to date by reading and studying.

CORE SKILLS

- Test Planning & Strategy
- Mentoring and Leading
- Selenium Webdriver
- Maven
- TestNG
- Java
- Cucumber
- SAAS
- Analytics
- Requirements Analysis
- Defect Triaging
- Kanban
- Agile (Scrum Methodologies)

- V – Model and Waterfall Model
- Defect Management
- End – to – End Testing
- Project Management and Monitoring QA Testing
- QA Functions
- Documentations and Test Execution Management
- Confluence
- BDD
- SDK Frameworks, Android Studio
- Salesforce
- SAAS

TECHNICAL SKILLS

Testing Tool:	ALM, TestRail, Jira, Selenium, Linux, Trello, LeanFT, Windows
Databases:	SQL Server (2005, 2008, and 2012), Oracle (10g and 11g), MS Access, Robomongo
Languages:	Java, Java script, Python, Node JS, C#, C++, .NET, Visual Basic, PHP, Ruby, C, JSON, Objective C, Scala, Angular, React
Web Tools:	ASP.NET, HTML, CSS, JavaScript, JQuery, Appium, Maven
CI tools:	TeamCity, Jenkins
